□ 品質保證 / Quality Assurance

鵬宇國際股份有限公司之品質系統，已取得ISO 9001品質系統認證，每項產品於出廠前，均經100%壓力檢測。
Panew's Quality Assurance system has been certified to ISO 9001 and each product must be passed 100% pressure test before delivery.

安全，可撓，簡單，快速，經濟
 安全首選 - 鵬宇消防撒水軟管

□ 安裝簡單，重置快速

SIMPLIFIED INSTALLATION, EASY RELOCATION.

相較於傳統硬管配置之曠日費時，不鏽鋼消防軟管由於本身之可撓性，可於極短時間內完成撒水頭之定位配置，大量減少現場施工時程與人工成本。此外，它亦提供於樓層或空間重置規劃時，有更大的彈性空間重新規劃安裝消防撒水頭，可同時兼顧美觀、經濟與安全性。

The mounting of sprinklers in suspended ceiling system with conventional mounting method is very laborious and time consuming. The use of the stainless steel sprinkler hose significantly minimises the efforts and laborious costs required for installation purpose, because the flexibility of the hose enable you to change the sprinkler location during renovations or conversions. Beauty, economy, security can be preserved at the same time.

□ 擁有高耐壓性能與良好的可撓度

HIGH PRESSURE RESISTANCE AND GOOD FLEXIBILITY.

一體焊接結構設計，安裝簡易無需現場施作銲接、塗裝或封膠。出廠前均經氣壓 (20 kg/cm²) 100% 耐壓檢測，瞬間結構耐壓更可達4倍設計壓力。產品經疲勞壽命與結構震動檢測，撓性結構可有效吸收因地震或結構晃動所導致天花板與消防管線間之位移，並大大降低因配管誤差或地震所導致之管路應力與洩漏情形發生。

One piece style construction, require no welding, painting or epoxy coating on site. All Sprinkler Hoses are tested with high pressure air - 20 kg/cm² before delivery. The hydrostatic pressure resistance is 4 times the design pressure. All models of sprinkler hoses had been passed fatigue life and construction vibration test. Allow for independent motion between ceiling grids and main pipe system during seismic activity. The stresses and leaks caused by earthquake or misalignment can be avoided.

□ 國際認證 安心的保證

INTERNATIONAL LABORATORY APPROVED.

鵬宇全系列消防軟管固定系統 - 含商辦大樓，無塵室，風煙管撒水頭固定系統，均經過多項嚴格實驗測試，並通過國際知名實驗室產品認證，其品質與安全性均被有效控管與維持，符合各地消防與保險法規相關要求，是一高品質且讓您安心的消防產品。

Including Commercial, Clean Room, and Duct sprinkler mounting system. All models of Panew flexible sprinkler hoses had been conducted with severe tests and got the products approved by famous laboratories. The quality and security is controlled and kept all the time. Meet the local fire protection laws worldwide and the insurance requirements. You could have a peace mind all the time using Panew Flexible Sprinkler Hoses.

□ 維修簡單，無需停機或停工

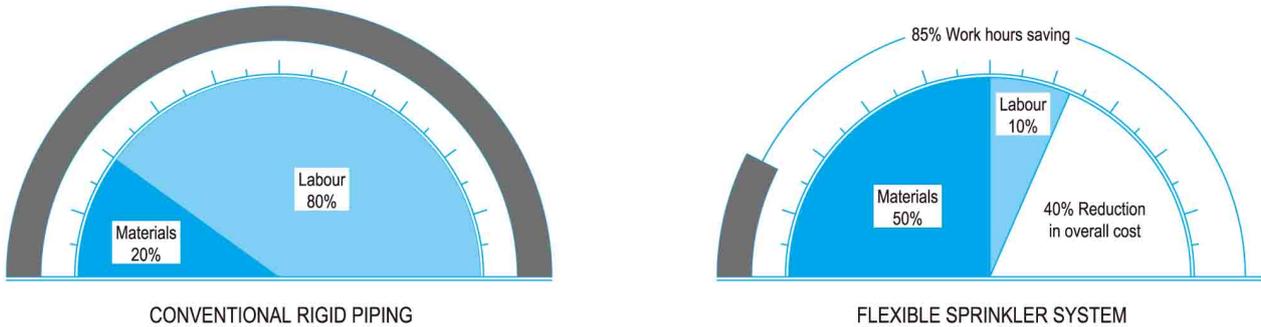

EASY REPAIR, KEEP RUNNING AND NO DOWNTIME.

針對商辦大樓消防撒水系統，撒水頭可視需求並依軟管本身之撓曲性能輕易位移與固定，不須大範圍施工與切焊管線。而無塵室與風煙管消防撒水系統，其撒水頭檢查與更換可在幾分鐘內完成，於維修保養期間，不僅可保持工作廠區的潔淨，更無需停工或停機。無形中大大的降低整廠的設備維護成本。

For Commercial system, the sprinkler could be relocated and mounted within the flexible area defined by the Sprinkler Hose length. It just needs a small constructed area, no pipes cutting and threading on site. For Clean Room and Duct system, the sprinkler can be inspected and replaced in a few minutes. The factory or working site can be kept clean and running during maintenance. Require no downtime for routine inspection and replacement. Eliminate the total cost for system repairment.

□ 傳統硬管配置與消防軟管配置系統之撒水頭安裝成本比較說明。

The sprinkler mounting costs comparison between conventional rigid piping and Flexible Sprinkler Hose system.
